

# PENINSULA QUARRIES

## Peninsula Quarries Community Engagement Group grants program

Peninsula Quarries Victoria services the development and civil infrastructure industry in the southeast region with a wide range of quarry material and products. It is an important supplier for infrastructure projects such as road building and liners for sewerage ponds. The company employ experts in their field to ensure the highest level of quality control and consistency in the products supplied.

Peninsula Quarries established the Peninsula Quarries Community Engagement Group (PQCEG) to engage with the local community. As part of the committee's work, the PQCEG announces its grants program and calls for applications.

The PQCEG determined that grants are available for environmental projects to be undertaken within the Somerville, Tyabb or Mornington region.

Local not-for-profit groups are invited to submit an application for a grant from the PQCEG. Organisations are required to be incorporated entities.

The total pool available is \$5,000 per annum so applications should not exceed that amount and recurrent funding will not be provided. There is no application form and the committee has not set a closing date for applications. When funds are exhausted, there will be no new grants until June 2019.

Applicants are invited to write to the Chair of the PQCEG, Mr Rob Gerrand, care of [clifton@cliftongroup.com.au](mailto:clifton@cliftongroup.com.au).

Applications should specify:

- The purpose for which the grant is requested
- At least one quote for the amount requested
- The benefits of the proposal
- Evidence of the organisation's ability to deliver the project
- Evidence of the organisation's incorporation.

Please note that successful recipients will be required to provide evidence (ie receipts and/or photos of completed works) the grant has been expended for the purpose requested and must be willing to participate in publicity about the grant.

Enquiries can be directed to the Clifton Group on 9654 3522.
